Virtual Care
Management

Get help managing your diabetes at no cost to you

There's a lot to keep track of when you're living with diabetes

When you have diabetes, you may only see your healthcare provider every couple of months to check your HbA1c. What if you could take the guesswork out of following your treatment plan?

Welcome to Philips Virtual Care Management, a personalized program combining an easy-to-use connected device with educational services and a health coach* to help you track your progress and stay on top of your condition. Blood glucose readings from the Blood Glucose Meter (BGM) are automatically sent to your care team via a cellular connection. This means you don't need internet or Wi-Fi.

Your welcome kit includes everything you need to get started

- Connected BGM
- Test strips
- Lancing device and lancets
- Quick Start Guide
- Nylon case
- AC charger
- Control solution

Good news!

Our coaches can also view readings from your continuous glucose monitor (CGM)! Call to learn more.[‡]

Consistent support can help you reach your goals
